## Project

---

Title: Screening and Phytochemical Evaluation of Polyherbal Gel for the Mitigation of Psoriasis

Duration: July 2025

- Conducted extensive research on selected medicinal herbs known for anti-inflammatory and skin-repairing properties.
- Formulated a polyherbal gel using herbal extracts and carried out phytochemical screening to identify active constituents.
- Evaluated the gel's efficacy through various in-vitro parameters relevant to psoriasis treatment.
- Outcome: Demonstrated promising results indicating the potential of herbal-based formulations in managing psoriasis symptoms.
